IN CASE OF WORK INJURY

• Notify your supervisor

• If an emergency, call 911 and ask to be transported to the nearest hospital. If your emergency involves exposure to animals, laboratory chemicals or biological agents, request transport to a St. David’s affiliated emergency room.*

• Minor first aid, including minor chemical & animal exposure incidents, are treated on-campus by the UT HealthPoint Occupational Health Program. Call for an appointment.

• After hours, you may choose an urgent care provider of your choice that is in the workers’ compensation IMO Network. [http://injurymanagement.com/find-a-provider/](http://injurymanagement.com/find-a-provider/)

---
